PROFESSIONAL SUMMARY

B.E. Computer Science and Engineering (IoT) student graduating in 2027, with skills in MERN Stack, Embedded Systems, and IoT. I have gained hands-on experience through internships and projects involving both software and hardware. Interested in developing software applications and integrating hardware with IoT technologies.

TECHNICAL SKILLS

Languages: JavaScript, Python, C.

ML / DL Frameworks : TensorFlow, PyTorch,

Data Tools & Visualization : Pandas, NumPy, Tableau.

Frontend: React.js (React 18 + Vite), HTML5, CSS3

Backend: Node.js, Express.js, REST API Design.

Databases: MySQL, MongoDB.

Tools & Concepts: GitHub, Postman, VS Code.

WORK EXPERIENCE

SAN TechNovation

- Developed and implemented Embedded Systems and IoT solutions for real-world applications.
- Worked with microcontrollers, sensors, and communication modules to build smart systems.
- Integrated hardware and software for data collection, monitoring, and automation.
- Tested, debugged, and optimized embedded applications for reliable performance.
- Collaborated with the development team to design and implement IoT-based prototypes.

KEY PROJECTS

Hospital Management System

Tech Stack: React.js, Node.js, Express.js, MySQL, Python

- Production-deployed healthcare platform managing patient records, appointments, and billing; reduced manual data entry by 70% with role-based dashboards for clinical and administrative staff.

AI Forest Fire Detection System

Tech Stack: Python, YOLOv8

- Developed a real-time AI system using computer vision to detect forest fires from camera feeds and dispatch automated alerts, reducing response latency.

•

PCB Defect Detection Using YOLO11 and Swin Transformer

- Worked on a YOLO11-TD based system using Python, OpenCV, and PyTorch to detect PCB defects, with a focus on identifying small defects accurately.

EDUCATION

B.E Computer Science & Engineering (Internet of Things)

Nandha Engineering College

Nandha Engineering College, Erode, Tamil Nadu | Anna University Affiliated

2023 - Present

PATENT & Journal

- FLAME CONTROL COATING FOR STRENGTHEN SAFETY MATCHSTICKS
20251072343
- AI-Driven Smart Pill Dispenser with ESP32 for Adaptive Scheduling and Remote Monitoring
